PROFILE

As a highly ambitious and passionate Software Developer, I am eager to further enrich my experience and contribute my skills to the industry. Over the past 2 years in the software industry, I have immersed myself in various development projects, discovering a deep-rooted passion for creating innovative solutions.

EXPERIENCE

Junior Developer - PT Distinction (*September 2021 - Present*)

- Proficiently rebuilt project frontend using the latest Vue.js framework, resulting in enhanced user experience and performance.
- Demonstrated proactive skills in day-to-day operations, promptly resolving hot fixes and ensuring smooth system functionality.
- Contributed to the development of core features for both the production system and beta version, delivering high-quality and scalable solutions.

Technologies:

- Php
- Laravel
- Vue.js
- Bash
- Pinia (frontend state management)
- Storybook
- Figma
- GitHub
- MySQL
- CSS
- SCSS
- HTML

Full-Stack Web Development - iO Academy (May 2021 - August 2021)

- Enrolled in a rigorous 16-week full-stack web development course, gaining in-depth knowledge of programming fundamentals and cutting-edge technologies.
- Obtained the Certified Scrum Master certification, showcasing my expertise in agile project management and collaboration.
- Collaborated effectively with a diverse team to successfully produce a range of projects, demonstrating strong teamwork and problem-solving skills.

PROJECT: PHP/koalaCars as an example of the projects

GitHub Repository: <https://github.com/iO-Academy/2021-may-koalaCars>

As part of a team project at iO Academy, I actively contributed to the development of a PHP-based Cars Collector application. The primary focus of this project was on creating high-quality code and implementing robust architectural patterns following the SOLID principles.

Key Project Highlights:

- Utilised cURL to efficiently fetch data from an external API and seamlessly populated a database with the retrieved car information.
- Implemented a Hydrator pattern to ensure efficient data retrieval and lookup of car details.
- Employed HTML and CSS to design and construct a user-friendly web page, displaying a comprehensive list of available cars stored in the database.
- Demonstrated strong teamwork and collaborative skills while working alongside my peers to achieve project objectives.

Technologies:

- Php
- cURL
- Slim
- React
- Node
- GitHub
- MySQL
- Gulp
- CSS
- SCSS
- HTML
